

Lifetime beauty, with tomorrow in mind

ABODO Wood

BY **FISHER**

IRON VITRIOL

ABODO eco-timber allows you to choose from a wide range of naturally stunning wood cladding options. We are here to assist our customers in choosing the perfect architectural profile for their project such as: vertical shiplap, rustic, or classic bevelled weatherboards. All ABODO products are crafted from renewable timbers, which allows our customers to choose from horizontal or vertical cladding profiles to get the look you want without sacrificing the environment.

Why Choose ABODO?

- High Style Impact with a Low Environmental Impact
- Thermally Modified FSC Certified (<https://fsc.org/en>) Radiata Pine
- Thermal Modification (Heat Treatment) increases overall density and durability of the wood
- Simple Maintenance Cycle with Improved Environmental Durability
- Backed By an Industry Leading Warranty
- Factory Applied Finishes Using Fishers' pre-coating system for superior coating longevity and performance
- 12 program colours to choose from

Fisher Coating is proud to distribute ABODO timber products originating from New Zealand.

ABODO timber is family-owned and operated by the Gudsell family, who pride themselves on keeping a low environmental impact with future generations in mind. ABODO utilizes Radiata Pine, which grows rapidly, and produces beautiful renewable timbers. ABODO'S products and coatings systems age with grace and natural beauty and their thermal treatment technology creates a very stable moisture content throughout the wood. In turn, ABODO experiences less grain lifting, warping and bending

than non-thermally treated wood. Although Radiata Pine is a soft wood, the thermal treatment process increases the hardness and density of the wood overall, providing incredible durability and overall stability of the wood. This incredible species can grow 4-8 feet per year in optimal conditions, giving us a naturally beautiful and sustainable product that is unparalleled in its ability to achieve style, function, and environmental mindfulness.

SPECIFICATIONS

PRODUCT:

- Cladding ■ Soffit ■ Siding ■ Trim
- Decking ■ Screens & Battens
- Interior Wall & Ceiling Panel
- Decorative Slats
- Dimensional Lumber

SUBSTRATE:

ABODO thermally modified timber products

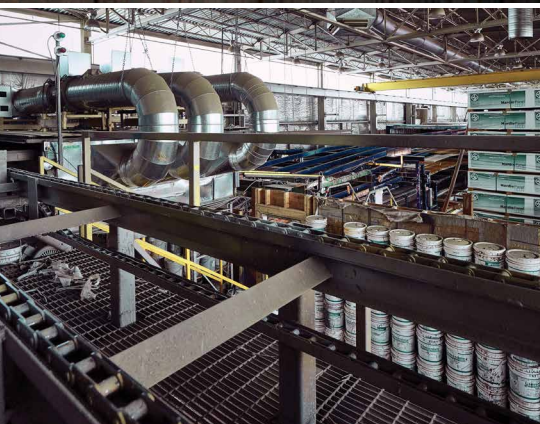

APPLICATIONS:

Single Family | Multi-Family | Commercial

VALUE ADDED: Touch Up Kit Available

WARRANTY:

15 year Limited warranty for Vulcan thermally modified timber supplied by Abodo

ABOUT FISHER

Fisher is a pre-stain manufacturing facility based in British Columbia specializing in semi-transparent coatings on both wood and fibre cement.

Originally established in 1998 as a painting contractor, Fisher opened the doors of the first pre-stain factory in 2008. Fisher currently operates in an automated manufacturing facility coating building materials for a wide range of projects and customers throughout North America.
